

Made with Corning cable

Fiber optic pigtailes are utilized in terminating fiber optic cables via fusion splicing or mechanical connection. Widely used in premise installations, telecommunications networks, data centers, CATV, FTTH/FTTX, LAN/WAN, and more. The Optix fiber optic pigtailes with twenty year product warranty uses a zirconia ceramic ferrule with a tight buffer Corning fiber cable for durability. Optix offers 900um pigtailes in 1m, 2m, and 3m lengths and all connector styles including LC, SC, ST, and FC connectors. They are designed, manufactured, and tested according to protocol and performance dictated by the industrial standards, including RoHS, REACH, and CE. These pigtailes will meet your most stringent mechanical and performance specifications.
