Connector Insert/Extract Tool

Works with LC, SC, & MPO Connectors

Introducing the FOC-22 insertion and extraction tool for fiber optic connectors. This tool makes the handling of fiber optic connectors in high density enclosures and patch panels very easy to manage. It works with LC and SC simplex and duplex connectors, and MPO connectors, particularly in high density environments. The tool tip design ensures positive gripping without slipping and the spring loaded tool action and ergonomic grip allows easy, comfortable, and precise left or right hand operation.

Features

- Easily inserts and extracts fiber optic connectors, particularly in high-density patch panels.
- Compatible with LC and SC simplex and duplex connectors as well as MPO connectors
- The tool tip design ensures positive gripping without slipping
- Engineered with ergonomic cushioned handles
- Its slim design fits between other installed connectors for easy access.
