

1.25mm & 2.50mm Fiber Connector Cleaning Sticks

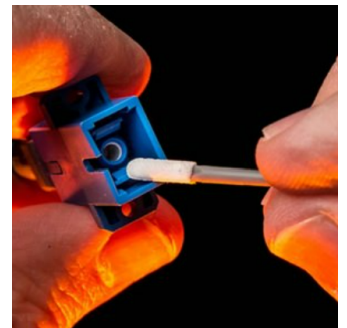

The Optix America Cleaning Sticks are reliable, inexpensive tools engineered for critical cleaning of the end face of fiber optic connectors. Cleaning Sticks use a dry alcohol-free cloth tip that can also be used with fiber optic cleaning fluid to perfectly clean the entire end face of the

connector, not just the central core. Precision molded to exact size and shape for either 2.5mm connectors (SC,ST,FC) or 1.25mm connectors (LC,MU), these cleaning sticks provide high purity cleaning with no fabric, foam, glues, or particulates. Color-coded for easy selection, they are perfect for cleaning the ferrule end face of connectors already installed in tight spaces such as patch panels or inside adapters or any contact area of receptacles used in high-speed fiber optic networks.

Features

- Clean Sticks are precision molded to exact size and shape for either 2.5mm connectors (SC,ST,FC) or 1.25mm connectors (LC,MU)
- Utilizes a dry alcohol-free cloth and can be used with fiber optic cleaning fluid
- High-purity cleaning tips uses no fabric, foam, glues or particulate
- Perfectly cleans the entire connector end face, not just the central core
- Precision molded to exact size & shape for better cleaning
- Color-coded for easy selection
- Excellent absorbency and contamination entrapment
- Available in 50 pieces per pack

Specifications

Parameter	Value
Material	Cleaning tip utilizes dry alcohol-free cloth
Size	1.25mm or 2.50mm precision engineered tip
Quantity	50 pieces per pack
Lint Free	Yes

Ordering Information

Part Number	Description
SWAB-250C	2.50mm Cleaning Stick for SC, ST, and FC connectors (50 pieces)
SWAB-125C	1.25mm Cleaning Stick for LC and MU connectors (50 pieces)
