

FIBER OPTIC QUICKCLEANS

Faster Fiber Cleaning & Avoid IPA Exposure

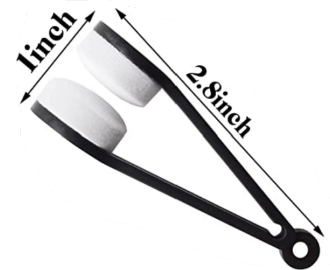

Fiber Optic Wet/Dry QuickCleans cleans fiber cable faster and also avoids damaging skin exposure to repeated use of isopropyl alcohol (IPA) which can cause itching, redness, rash, drying, and cracking.

The QuickClean tweezer design includes lint free pads for superior cleaning and a loop tie down on end to prevent from getting lost. They can be used wet or dry and are made of non-woven, high density, hydro-entangled, 45/55 cellulose/polyester blend for optimum purity. High strength with excellent absorbency, these QuickCleans are tested to over 100 uses each before they can be discarded. Ten QuickCleans per pack plus one fluid bottle (1 ounce).

Features

- Tweezer design saves time when cleaning fiber cable
- Avoids damaging skin exposure to isopropyl alcohol
- Provides superior cleaning for any fiber optic cable
- Excellent absorbency, lint free, high density, non-abrasive pads
- Tested to provide over 100 uses per QuickClean
- Loop tie down on end to prevent from getting lost
- Ten Wet/Dry QuickCleans & one fluid bottle (1 oz) per pack
