

External Fusion Splicer Heater

Splice Faster & Save Time

The Optix America external fusion splicer heater, made of premium alloy material, will improve work efficiency and save time for the professional splicer technician. Small and lightweight, it perfectly heats all sizes of splice protection sleeves, and is compatible with LC and SC splice-on connectors sleeves. In addition, it has automatic heating upon detection of fiber cable with four temperature settings.. The rechargeable lithium-ion battery provides over 200 heating cycles per charge.

Features

- Perfect for heating splice protection sleeves & sleeves for splice-on connectors (LC & SC)
- Automatic heating upon detection of fiber cable
- Four temperature settings for fast heating of different splice sleeve sizes
- Rechargeable lithium-ion battery lasts over 200 heating cycles
- Lightweight, compact, and made of premium alloy material for ease of use and durability
- Package includes case, charger, and heater
