

GRIPTITE Fiber Holders 900um & 250um

Technology for Faster Cable Stripping

Quicker and faster fiber cable stripping for 900um and 250um is now available! The GRIPTITE fiber holders patented holding technology grips the cable tighter than other fiber holders, saving steps in the stripping process for the fiber optic professional. Our two step process includes inserting the fiber holder into the thermal stripper and pulling it out. It's that Simple! No need to shut and squeeze the thermal stripper cover, just pull and strip. This process is easier and saves time. Proprietary holder system included with the WRX600 core alignment and WRX400 clad alignment fusion splicer.

Features

- GRIPTITE patented technology grips 900um and 250um cable tighter than other fiber holders saving steps in the stripping process
- Two step process includes inserting the fiber holder into the thermal stripper and pulling it out
- No need to shut the thermal stripper cover
- No need to squeeze the thermal stripper cover
- Just pull and strip
- Easier and faster process
- Proprietary system included with the WRX600 core alignment and WRX400 clad alignment fusion splicer
