

# Splicer V-Groove Cleaning Kit

## Ideal for Cleaning Ribbon Splicer V-Grooves

Optix America has combined its recommended fusion splicer v-groove cleaning products into a single kit for effortless convenience. Dust, dirt, and fiber coating debris will eventually find their way to the surface of the fusion splicer v-groove and this contamination will offset the fibers and degrade performance.

To solve these cleaning needs, Optix offers the Fusion Splicer V-Groove Cleaning Kit. This kit includes the highest quality tools into an affordable and effective inspection and cleaning solution for any fusion splicer. It includes the items required to identify and remove these contaminants including the specialized v-groove cleaning pen, slide-out 30X LED magnifier, v-groove cleaning swabs, and more. The v-groove cleaning pen offers fiberglass bristles that can be extended to the optimal length and hardness simply by twisting the cap. And when the bristles are spent, they can be cut for fresh ones.

### Items Included in Kit

- V-Groove cleaning pen (p/n SVGC-PEN)
- Sweeper brush with soft nylon bristles
