

## 1.25mm & 2.50mm Fiber Connector Cleaning Sticks

Optix America Cleaning Sticks are reliable, cost effective tools engineered for the critical cleaning of fiber optic connector end faces. Featuring a dry, alcohol-free cloth tip, these sticks can be used alone or with cleaning fluid to thoroughly clean the entire end face.

Precision-molded to exact specifications, they are available for both 2.5mm (SC, ST, FC) and 1.25mm (LC, MU) connectors. These color-coded sticks provide high-purity cleaning without the use of fabrics, foam, glues, or particulates. They are ideal for cleaning ferrule end faces in tight spaces, such as patch panels and adapters, as well as contact areas within high-speed fiber optic network receptacles.

### Features

- Cleaning Sticks are precision molded to exact size and shape for 2.5mm connectors (SC, ST, FC) or 1.25mm connectors (LC, MU)
- Utilizes a dry alcohol-free cloth and is compatible with fiber optic cleaning fluid
- High-purity cleaning tips contain no fabric, foam, glues or particulates
- Perfectly cleans the entire connector end face, not just the central core
- Offers excellent absorbency and contamination entrapment
- Color-coded for easy selection and available in packs of 50

### Specifications

Parameter	Value
