

Color-Coded Assemblies

OPTIX fan-out kits protect and transition bare 200µm or 250µm fibers into 900µm buffer tubes, ensuring reliability across various optical fiber installations. Field-installable without specialized tools, these kits offer a straightforward solution for direct connector termination. The color-coded assembly simplifies fiber organization and accelerates the installation process. Kits are pre-configured for 6 and 12-fiber applications and include 36" lengths of 900µm tubing in industry-standard colors. Designed for long-lasting performance, the OPTIX breakout kit provides a secure transition that enhances the durability and efficiency of your fiber optic network.

Features

- Transitions and protects 200µm or 250µm fibers into 900µm buffer tubes for termination
- Color-coded 900µm buffer tubes allow for easy identification of individual fiber channels
- Epoxy free installation and requires no special tools
- Compatible with industry splice-on connectors and mechanical connectors
- Available in 6 and 12 strand counts in 36" lengths

Specifications

Parameter	Value
Fiber Count	6 or 12 buffer tubes
Length	36 inches
Environment	Indoor
Temperature	-0°C to 70°C

Ordering Information

Part Number	Description
FO6-36-KIT	Fan-out kit with 6 color-coded tubes, 36" length, 1 position base
FO12-36-KIT	Fan-out kit with 12 color-coded tubes, 36" length, 1 position base
