

Holders for 1X Splice-on Connector

Connector holders for fusion splicer brands

The Optix specialized holders are engineered specifically for our 1X splice-on connectors, ensuring fast and reliable field termination. Each holder is designed to work seamlessly with most major fusion splicer brands, including WRX, Fujikura, Sumitomo, INNO, Fiberfox, and UCL Swift. Each holder is compatible with all connector styles, LC, SC, and ST, and the process is simple: just place the connector body into the holder, insert it into the fusion splicer, and complete the splice. By utilizing gravity to maintain proper connector positioning, the holder design eliminates the need for a hinged door or additional securing mechanism, saving valuable time in the field.

The patented ridge feature further enhances performance by allowing the fusion splicer to perform the 2.2N mechanical pull test without the connector slipping out or breaking, a common issue with conventional holder designs.

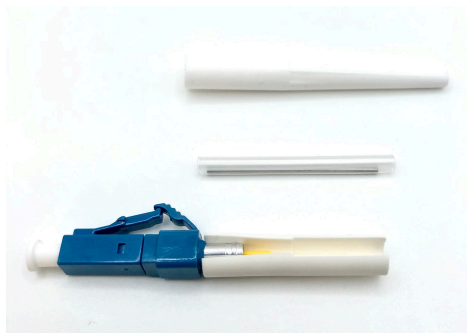

Overall, the Optix holder delivers fast, consistent, and efficient termination of 1X splice-on connectors in under two minutes.

Features

- Designed specifically for Optix 1X splice-on connectors
- Enables fast, consistent field termination
- Complete splice-on connector termination in under two minutes
- Compatible with major fusion splicer brands: WRX, Fujikura, Sumitomo, INNO, Fiberfox, and UCL Swift
- Works with all connector styles: LC, SC, and ST
- Simple operation—place connector body into holder, insert into fusion splicer, and splice
- Gravity-based design keeps connector properly aligned without the need for a hinged door
- Eliminates extra securing steps, saving time in the field
- Patented ridge design supports 2.2N mechanical pull test without connector slippage or breakage

Ordering Information

Part Number	Fusion Splicer Brand
1XSOCHOLDER-A	INNO, Fiberfox
1XSOCHOLDER-B	Sumitomo
1XSOCHOLDER-R	Fujikura
1XSOCHOLDER-S	UCL Swift
1XSOCHOLDER-W	WRX

1X 900um Splice-On Connectors

Substitute LC, SC, or ST, for ** complete part numbers.
