

# Splicer V-Groove Cleaning Kit

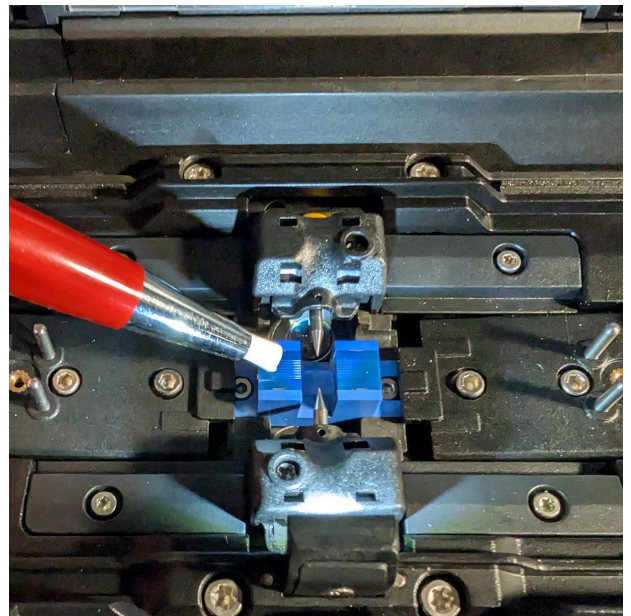

## Ideal tools for cleaning splicer v-grooves

Dust, dirt, and fiber coating debris will eventually find their way to the surface of the fusion splicer v-groove and this contamination will offset the fibers and degrade performance. To solve these cleaning needs, Optix America has combined its recommended fusion splicer v-groove cleaning products into a single kit for effortless convenience. This kit includes the highest quality tools into an affordable and effective inspection and cleaning solution for any fusion splicer. The specialized v-groove cleaning pen offers bristles that can be extended to the optimal length and hardness simply by twisting the cap and spent bristles can be cut off for fresh ones.

## Items Included in Kit

- V-Groove cleaning pen (p/n SVGC-PEN)
- V-Groove cleaning needle .15mm OD (10)
- Retractable sweeper brush
- Stainless steel bristle brush
- Nylon bristle brush
